Specification of Horizontal Optical Splice Closure MODEL GP TYPE

Fiber Optical Splice Closures—MC004 are 2 in 2 out hermetically sealed dome fiber optical splice closures designed for aerial, buried/underground and wall-mounting applications. These closures help meet the needs of anyone deploying fiber optic networks: straight/ direct fiber connection, bifurcating fiber connection. FOSC-GP-04 closure features an 0-ring sealing system along with an innovative latching/ locking mechanism, and uses heat shrink technology for cable sealing. The closure is designed to allow re-entry and can be resued.
