	Product Name	Key Feature
	UT-210 **RS-232 to TTL** **Mini-size**	

INTRODUCED

I.   Summary:

UT-210 is a versatile RS232 / TTL converter, no external power supply, compatible with RS232, TTL standard, single-ended RS232 signals into TTL signals TTL-side connection terminals. Converter with internal zero delay automatic transceiver conversion, unique I / O circuit automatically controls the data flow direction, without any handshaking signals (such as RTS, DTR, etc.) without jumper settings TTL mode conversion, Plug and Play with. Ensure that it meets all the existing communication software and interface hardware. UT-210 interface converter for point-to-point communications to provide reliable connectivity, data communication rate 300-921600bps, means of communication with a power indicator and data flow indicator, support RS232 to TTL conversion.

II.   Specification:

- RS-232 side in DB9 female,
- Baud rate: 300BPS-115.2KBPS;
- 3.3V and 5V can be choosed
- Size:63mmX33mmX17mm
- Environment:-40-85℃, Relate humidity 5-95%

INFORMATION ORDER

MODEL: UT-210   Port-powered, Mini-size
                                        RS-232 to TTL
