INTRODUCED

I. Summary:

Our 10/100M fiber optic transceiver used for 100Base-TX twisted pair and 100Base-FX fiber optic cable or data communication between 10Base-T twisted pair and 10Base-FL fiber optic cable. Auto-adapt 10/100Mbps, easy to upgrade. It can extend the limit of the network transmission distance from 100M of the twisted-pair to 100KM above. It can easily achieve the interconnection among the motherboard servers, repeaters, hubs, terminals and terminal.

II. Specification:

- It uses a high-quality photoelectric integration module to provide good optical properties and electrical properties to ensure reliable data transmission, with a long working life.
- Support full-duplex or half duplex mode, and with auto-negotiation capability.
- 10 Mbps and 100Mbps auto-adapt.
- Ethernet ports support automatic cross-identification.
- With store and forward mechanism, cache 1MB, support for multiple protocols.
- Support the maximum transmission packet size of 1600 bytes of data.
- In line with carrier-class operating standards, MTBF 50,000 hours or more.
- Power Supply: DC9-48V/500mA
- Use the SC fiber optic connector (ST, FC interface can be optioned)
- Urge protection: 3000V (power supply)
