UT-810T **1-port USB to RS-232 Serial Converter with ESD protection**	ESD protection

INTRODUCED

I.   Summary:

USB to serial port allows you to easily establish a reliable connection between the serial port (RS-232) and USB interface. Plug and Play and hot swap capabilities through the use of the USB interface to the serial port (RS-232) peripherals provide a very easy to use environment. Its design allows you to easily connect devices such as mobile phones, digital cameras, ISDN-TA , Modem , and provides transfer rates up to 1Mbp

II.   Specification:

- Fully compatible with USB (Universal Serial Bus) VER: 1.1
- Support for RS-232 interface
- The standard DB9 serial port
- Serial transmission speed up to 1Mbps
- Support automatic handshake agreement
- Support remote wake-up and power management
- With USB Direct power supply, do not need additional power supply
- ±15KV ESD protection
- The ASIC chip can support USB port to the serial port communication.
- Transmission distance: 5m
- Working environment: -25℃ to 70℃, relative humidity 5% to 95%.
- Windows98/2000/WinXP/ Vista/Linux supported.
