

Multifunctional Optical Receivers

MODEL: OFR-MOR-004

Products Description

- Optical receiver and power supplier integrated in one device. Suitable for the low cost and small space of installation networks.
- Easy to install, could replace the original optical receiver and power supplier, mix the signal and 60V voltage to reduce cost and fault rate.
- High performance PIN photodiodes to reduce noise, distortion and optical power.
- Use high quality NXP or NEC module, make sure good C/N, C/CSO, C/CTB data for the network..
- High-powered ring transformer. No noisy, low leakage, low temperature rise, high efficiency.
- Over current protection, protection and recovery are full-automatically.
- Delayed off function, surge current suppression.
- High quality waterproof case.
- Excellent ability of lightning protecting ensures long-time stable and continuous working in an adverse environment.

Technical parameter

Optical Receiver

Reference to Building Optical Receivers

Power Supplier

Reference to Intelligent Aluminum Alloy Case Power Suppliers
